

Health, Household and Personal Care

Custom Manufacture

Innovative, International, Independent.

Thomas Swan are leading manufacturers of performance and speciality chemicals with over 20 years' experience – delivering products and intermediates to the health, household and personal care industries.

Our Custom Manufacture Division works in close partnership with customers to manufacture their products on a contract or toll basis, providing the additional capacity and capability they need. Following a recent investment to commission a new flexible glass-lined plant, we now operate one of the most sophisticated and technically advanced facilities anywhere – equipped to deliver both liquid formulations and solid products bespoke to customers' own specifications.

We have partnerships and expertise in the following areas:

Cosmetics

Personal care

Flavour and fragrance

Household & health

FDA, GMP approved soaps/antimicrobials

Hair care products

Testimonial from a Global Flavour and Fragrance Organisation

“Quest, now known as Givaudan, approached Thomas Swan in order to outsource a large product in order to free up capacity in our own equipment. From the initial scouting discussions to the technical handover discussions between the two companies Thomas Swan was very open and professional. A close working relationship developed quickly between the development chemists in Quest and Thomas Swan leading to the positive outcome from the scale up trials which involved both Quest and Thomas Swan on the plant. The product has continued to be outsourced.”
